

This project would not have been possible without support, funding, expertise, cooperation and effort from the following organizations. We'd like to express our gratitude.

Funding Partners:

Funded project design:
2003-2005
Funded first six years:
2005-2011

Funded majority of long-term
monitoring:
2011-Present

Great Northern LCC
funded one year
long-term monitoring:
2010-2011

Funded long-term fuels
monitoring:
2011-Present

Research/Management Partners:

University of Nevada, Reno
Provided two scientists
and two graduate students.

Provided two scientists, four support
staff, one graduate student and field
teams.

Provided three scientists, two support
staff and field teams.

Provided three scientists, three
support staff and field teams.

Provided one scientist, two
support staff, three graduate
students and field teams.

Provided three scientists, two support
staff, five graduate students and field
teams.

Provided land for one Wyoming
big sage site.

Provided land and treatment
implementation for three Wyoming
big sage sites.

Provided one scientist, one
support staff, and one
graduate student.

Provided land and treatment
implementation for one Wyoming
big sage site.
